SUPPLEMENT TO
REPORT NO.

THIS IS UNEVALUATED INFORMATION

- 25X1 1. Reportedly, 50 per cent of the able-bodied male population of Cristian had
been sent to Turda in 1950 to do some sort of work with concrete. [redacted]
[redacted] men from
25X1 other villages had also been brought to Turda for the same type of work, the
nature of which was not disclosed.
- 25X1 2. [redacted]
[redacted] in Bod (NNE of Brasov) [redacted] had
25X1 been drafted on 1 July 1951 "not as the others (into labor units), but into
regular army combat units."
- 25X1 3. Reportedly, all along the Ilva Mica-Rodna highway wooden barracks are
being built or have just been completed. The barracks are located about
one or two km. apart and about 200-300 meters from the highway. A
sawmill at Ilva Mica prepared the timber exclusively for the construction
of these barracks, which are being erected by soldiers of labor units
and peasants from that area who had been "requisitioned" for the work.
